30. Introduction – WebCAT Catalog

The WebCAT Catalog provides the functions necessary for all countermen to look up part numbers for specific car applications. The lookup information will display part numbers, quantity on hand and prices for parts within the inventory file. Items can then be sold (or posted) from the catalog back into an open workspace.

30.1 Accessing The PartExpert Catalog

- From the *Autologue Main Menu*, enter **1** (*Point of Sale*) and press **<Return>**.
- The point of sale program will be loaded and the **COUNTERMAN CODE** prompt will now appear.
- With the cursor positioned at the **COUNTERMAN CODE** prompt, enter a counterman code (A - 9) and press **<Return>**.
- With the cursor positioned at the **ENTER CUSTOMER NAME OR NUMBER** prompt, enter the customer's name or customer number and press **<Return>**.
- Within the open workspace, press the **<F16>** key.

A window will pop-up, select the **ePart Catalog** menu option using the arrow keys and pressing **<Return>** or enter the number corresponding to the selection desired and press **<Return>**.

A WebCAT web browser screen will appear as follows:

New Order

Functionality to lookup parts for vehicles works exactly like ePartConnection would.

- Once all the desired parts are selected and added to the order, click on the grey *Back To Order* button positioned in the top left corner of the screen to return to the open workspace and the first part that was selected will be displayed and the cursor will be in the **QTY** field. Enter the quantity to sell and then extend the part number.

This process will be continued until all parts, that were selected, are extended. A text write in line will then be appended to the workspace showing the year, make, model, and engine size as shown:
