31. Introduction – ViSiCAT Catalog

The ViSiCAT Catalog program provides the functions necessary for all counter men to look up part numbers and display the quantity on hand and customer's prices for parts within the inventory file. This information can then be transferred directly into Point of Sale and Invoices without having to re-type all the selected parts and prices. The user also has the ability to lookup interchange information for a part number.

31.1 Setting Up The Catalog

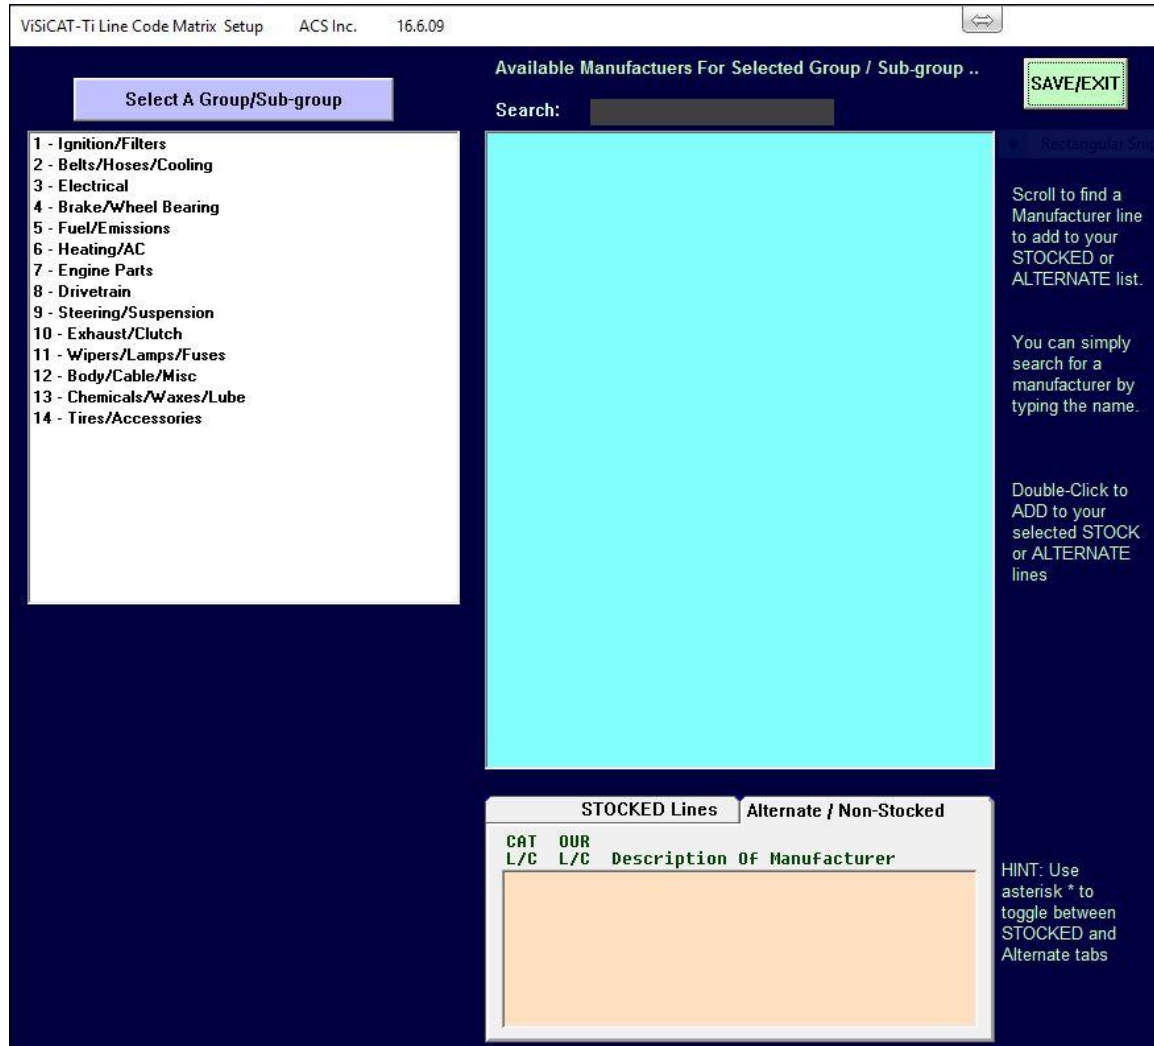

The first step in using the ViSiCAT Catalog software is to setup the primary and secondary manufacturer groups to be displayed as well as the manufacturer code translation information. This information is used to prioritize how manufacturer part information is displayed and translates the manufacturer codes within the inventory file to the default codes within the Catalog. This step is necessary if, for example, Wix Filter part numbers are to always come up first and Fram Filter part numbers to always come up next. Also if, for example, the default manufacturer code for Wix is WIX and manufacturer code within the inventory file for Wix is WXF, the user would then have to setup the manufacturer code within the inventory file within this table for each group of parts.

Below are the steps to setting up the translation table information:

- From the PC desktop, double click on the ViSSetup icon:

The *Select A Group/Sub-group* screen will appear as shown:

Note: The setup for the catalog is a single user program! There should never be more than one person setting up catalog coverage.

31.1.1 Selecting A Group/Sub-Group

- Select a parts group by positioning the mouse pointer over the desired part group to be setup and left click.

A list of sub-groups will then be displayed below the selected part group.

STOCKED Lines Alternate / Non-Stocked

CAT L/C	OUR L/C	Description Of Manufacturer
FRA	FRA	FRAM
WIX	WIX	WIX

HINT: Use asterisk * to toggle between STOCKED and Alternate tabs

- Continue this process until all the desired manufacturers to be setup for the selected catalog group/sub-group.

31.1.3 Changing The Manufacturers Priority Order

To change the priority order for a listed manufacturer, click on the manufacturer line within either the *STOCKED* or *ALTERNATE* tab. Use the plus <+> or minus <-> keys move the manufacturer line up/ down within the list and thus change the priority order of the manufacturers listed. The order they are listed in is the order they will be displayed when looking up parts within the catalog.

The asterisk <*> key can be used to toggle between the *STOCKED* or *ALTERNATE* tabs.

- Repeat this process for all Groups/Sub-Groups by clicking on the blue *Select A Group/Sub-group* button and continuing as described.
- Once all the Groups/Sub-Groups have been setup, click on the green *Save/Exit* button to save the entered catalog setup information and close the ViSSetup program.

31.2 Accessing The Catalog

- From the PC desktop, double click on the ViSSetup icon:

- From the *Autologue Main Menu*, enter **1** (*Point of Sale*) and press **<Enter>**.
- The point of sale program will be loaded and the **COUNTERMAN CODE** prompt will now appear.
- With the cursor positioned at the **COUNTERMAN CODE** prompt, enter a counterman code (A - 9) and press **<Enter>**.
- With the cursor positioned at the **ENTER CUSTOMER NAME OR NUMBER** prompt, enter the customer's name or customer number and press **<Enter>**.
- Within the open workspace, press the **<F16>** key.

A window will pop-up, select the **ViSiCAT Catalog** menu option using the arrow keys and pressing **<Enter>** or enter the number corresponding to the selection desired and press **<Enter>**.

The Catalog screen will appear as follows:

Acc#: 251 **CERTIFIED APPLIANCE** **Veh:** (714)587-7485

31.3 Looking Up Information Within The Catalog

The cursor will now be positioned within the **Year** prompt.

- With the cursor positioned within the **Year** prompt, enter the last two digits of the year and press **<Enter>**.

The screen will now display a drop down selection *make* window that shows the allowable car makes for the entered year and the first make will be highlighted as shown:

The screenshot shows the ViSiCAT-Ti software interface. At the top, it displays 'Acc#: 251', 'CERTIFIED APPLIANCE', 'Veh: (714)587-7485', and the title 'ViSiCAT-Ti'. Below this is a navigation bar with buttons for 'F2 New Look-Up', 'F3 Vehicle' (highlighted), 'F4 Parts', 'F5 Interchange', 'F9 View Cart', and 'F8 P.O.S.'. To the right of the navigation bar, it shows 'Data Version 07 / 2016' and 'Sock# 3389'. The main area has a 'Year' prompt set to '2001' and a 'New!' button. Below the year prompt is a dropdown menu for car makes, with 'ACURA' highlighted. To the right of the make dropdown is a 'Find Vehicle by either Plate# or VIN' section with a 'CA California' dropdown and a 'Vehicle ID No.' field. Below this are 'Retrieve By Plate' and 'Retrieve By VIN' buttons. At the bottom, there is a '[F6] Previous Vehicles' section with a list of vehicles and their details. To the right of this list are instructions: 'Items at the top of the list in THIS COLOR are vehicles for THIS Customer' and 'Items this colour are for all other customers'. At the bottom right, it says 'Use [Enter] or double-click to select a previous vehicle.'

- With the cursor positioned below the **- make -** prompt, enter the first few letters of the desired make or use the up/down arrow keys to highlight the desired make and press **<Enter>**.

The screen will now display a drop down selection *model* window that shows the allowable car models for the entered year/make and the first model will be highlighted as shown:

The screenshot shows the ViSiCAT-Ti software interface. At the top, it displays 'Acc#: 251', 'CERTIFIED APPLIANCE', 'Veh: 2001 GMC', and '(714)587-7485'. The title bar reads 'AUTOLOGUE : Electronic Cataloging with Terminal Emulation Interface Autologue Computer Systems Inc. *DEBUG ON*16.8.28'. Below the title bar, there are function keys: 'F2 New Look-Up', 'F3 Vehicle' (highlighted), 'F4 Parts', 'F5 Interchange', 'F9 View Cart', and 'F8 P.O.S.'. On the right, it shows 'Data Version 07 / 2016' and 'Sock#: 3389'. The main area has a 'Year' field set to '2001' and a 'GMC' make selection. A 'New!' icon with a hand points to a 'Find Vehicle by either Plate# or VIN' section. This section includes a dropdown menu set to 'CA California' and a 'Vehicle ID No.' field. Below these are 'Retrieve By Plate' and 'Retrieve By VIN' buttons. A list of 'Previous Vehicles' is shown, including Toyota Camry, GMC Sierra, and Toyota Corolla. On the left, a '- model -' dropdown menu is open, showing a list of models with 'DENALI' highlighted at the top. To the right of the model list, there are instructions: 'Items at the top of the list in THIS COLOR are vehicles for THIS Customer' and 'Items this colour are for all other customers'. At the bottom right, it says 'Use [Enter] or double-click to select a previous vehicle.'

- With the cursor positioned below the **- model -** prompt, enter the first few letters of the desired model or use the up/down arrow keys to highlight the desired model and press **<Enter>**.

The screen will now display a drop down selection *engine* window that shows the allowable engine sizes for the entered year/make/model and the first engine size will be highlighted as shown:

The screenshot shows the ViSiCAT-Ti software interface. At the top, the title bar reads "AUTOLOGUE : Electronic Cataloging with Terminal Emulation Interface Autologue Computer Systems Inc. *DEBUG ON*16.8.28". The main header displays "Acc#: 251 CERTIFIED APPLIANCE (714)587-7485" and "Veh: 2001 GMC PICKUP SONOMA (S15/T15)". The "ViSiCAT-Ti" logo is on the right. Below the header, there are function keys: F2 New Look-Up, F3 Vehicle (highlighted), F4 Parts, F5 Interchange, F9 View Cart, and F8 P.O.S. The "Data Version" is 07 / 2016 and "Sock#" is 3389. The main area shows "Year 2001" and "GMC". A "PICKUP SONOMA (S15/T15)" dropdown is selected. On the left, an "engine" dropdown is open, showing a list of engine options: "1: L4-134ci 2.2L FLEX/FI Vin 5" (highlighted), "1: L4-134ci 2.2L FLEX/FI Vin 5", and "2: V6-262ci 4.3L F/I Vin W". On the right, there are search options: "CA California" (selected) and "Vehicle ID No.". Below these are "Retrieve By Plate" and "Retrieve By VIN" buttons. A "Previous Vehicles" list is shown, containing various vehicle models and specifications. A note on the right states: "Items at the top of the list in THIS COLOR are vehicles for THIS Customer. Items this colour are for all other customers. Use [Enter] or double-click to select a previous vehicle."

- With the cursor positioned below the – **engine** – prompt, enter the number to the left of the *engine* desired or use the up/down arrow keys to highlight the desired engine size and press **<Enter>**.

The screen will now display a listing of catalog groups and the sub-groups for the highlighted group:

The screenshot displays the ViSiCAT-Ti software interface. At the top, the title bar reads "AUTOLOGUE : Electronic Cataloging with Terminal Emulation Interface - Autologue Computer Systems Inc. *DEBUG ON*16.8.28". Below this, a header section contains vehicle information: "Acc#: 251 CERTIFIED APPLIANCE (714)587-7485" and "Veh: 2001 GMC TRUCK PICKUP SONOMA (S15/T15) V6-262ci 4.3L F/I Vin W ID#24272". The "ViSiCAT-Ti" logo is on the right. A navigation bar below the header includes buttons for "F2 New Look-Up", "F3 Vehicle", "F4 Parts" (highlighted), "F5 Interchange", "F9 View Cart", and "F8 P.O.S.". To the right of these buttons, it shows "Data Version 07 / 2016", "localhost", and "Sock#: 3389".

The main interface area is divided into sections. On the left, there are input fields for "Year" (set to 2001), "GMC", "PICKUP SONOMA (S15/T15)", and "V6-262ci 4.3L F/I Vin W". A "New!" button with a hand icon is next to the Year field. In the center, under the "Group" prompt, a list of 14 catalog groups is displayed, with "1: Ignition/Filters" highlighted. To the right of this list, under the "Sub Group" prompt, a list of 8 sub-groups is shown, including "1: Filters & PCV", "2: Tune-Up and Ignition", "3: Ignition Misc", "4: Spark Plugs and Glow Plugs", "5: Ignition Wires", "6: Computers and Relays", "7: Distributor and Components", and "8: Specifications". A "[Space] PROCEED" button is located to the right of the sub-group list.

At the bottom, there is a "[F6] Search" button with a magnifying glass icon, a "Sub-Groups" label, and a text box containing the number "0".

- With the cursor positioned at the **Group** prompt, use the up/down arrow keys to highlight the desired part group or enter the number next to the part group desired and press **<Enter>**.

The screen will now display a list of the available sub-groups for the entered part group as shown:

Preferred Press * to switch Alternates [F6] All Lines

- Description:** Part descriptions displayed either come from the inventory file or will default to the description supplied from the Wrenthead catalog data.
- IMAGE:** This column will have an **[F1]** next to any part which has an Image (smart page) link.
- VQ/ALT:** Normally this is the Vehicle Quantity. However, if this line item is a supercede or an alternate, it will display ***SUPE** or ***ALT** respectively.
- Qty OH:** This column will display the quantity on hand. However, if the item is NOT found within the inventory file, it will display **nif** (not in file). If the part is not found within the inventory file but exists with the electronic price sheet database, it will display **EPS**.
- Cust Pr.:** This is your customer's net price (less core) according to the customer's exception and standard pricing matrix setups.
- LIST:** The list price associated with the item that comes from the inventory file or electronic price sheet database.
- Years:** This column shows the year expanse for this application (i.e. 2003-2005).
- Data Version** Displays the date of the *Wrenthead Part-Select™ Catalog* DVD data version.

31.3.2 Viewing Alternate Manufacturer's

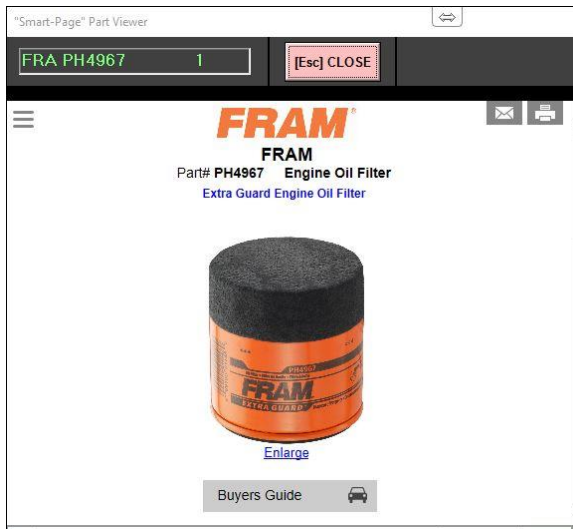

Users have the ability to view the *Alternate Manufacturer's* parts once the *Primary Manufacturer's* parts have been displayed by pressing the asterisk (*) key. The screen will now display the *Alternate Manufacturer's* parts information on the screen.

Alternate Manufacturers are those that were setup within the alternate tab window for the part groups.

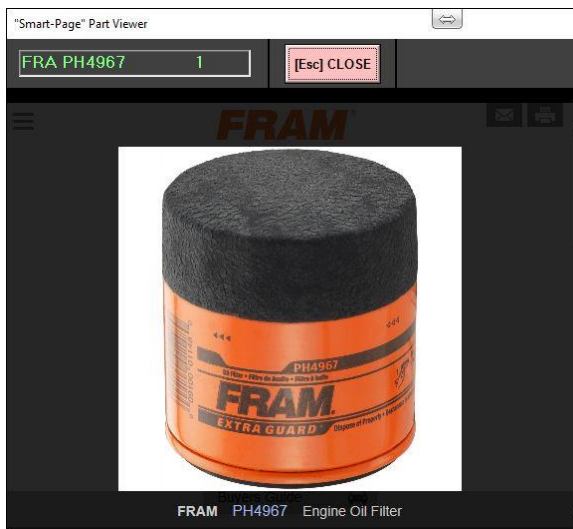

31.3.3 Viewing Part Images

- When a listed part number has **[F1]** displayed to its left, the user can view the part image information by either single clicking on the desired part or using the up (↑) and down (↓) arrow keys to highlight the desired part and then pressing the **[F1]** (Image) or the letter **[P]** (Picture) key.

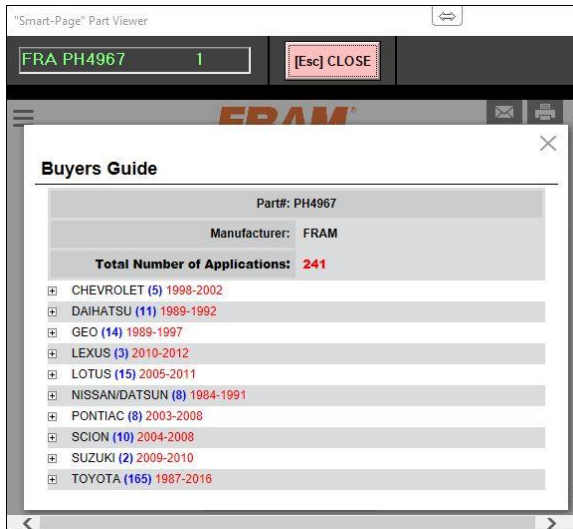

A “Smart-Page” Parts Viewer window will pop up displaying the part image as shown:

The user can click on the blue *Enlarge* link to view a larger image of the part as shown:

The user can click on the grey *Buyers Guide* button displayed at the bottom of the “Smart-Page” Parts Viewer window to view the buyer’s guide information as shown:

- Click on the red **[Esc] CLOSE** button or press the **<Esc>** to close the window and return to the catalog screen.

31.3.4 Selling A Part From The Catalog

- To sell a part listed on the screen, either double click on the desired part or use the up (↑) and down (↓) arrow keys to highlight the desired part and press **<Enter>**. The quantity shown in that items *VQ/ALT* will be selected to be sold. If you want a quantity different than the vehicle quantity, first enter in the new quantity within the *Sell Qty* field, and then press **<Enter>**.

The background of the part sold will now be displayed as red and the selected part number will now be displayed within the lower green shopping cart window area of the screen as shown:

31.3.5 Navigating Within The Catalog

The following sections describe how to navigate within the catalog.

31.3.5.1 Scrolling Forward/Backward Through Parts

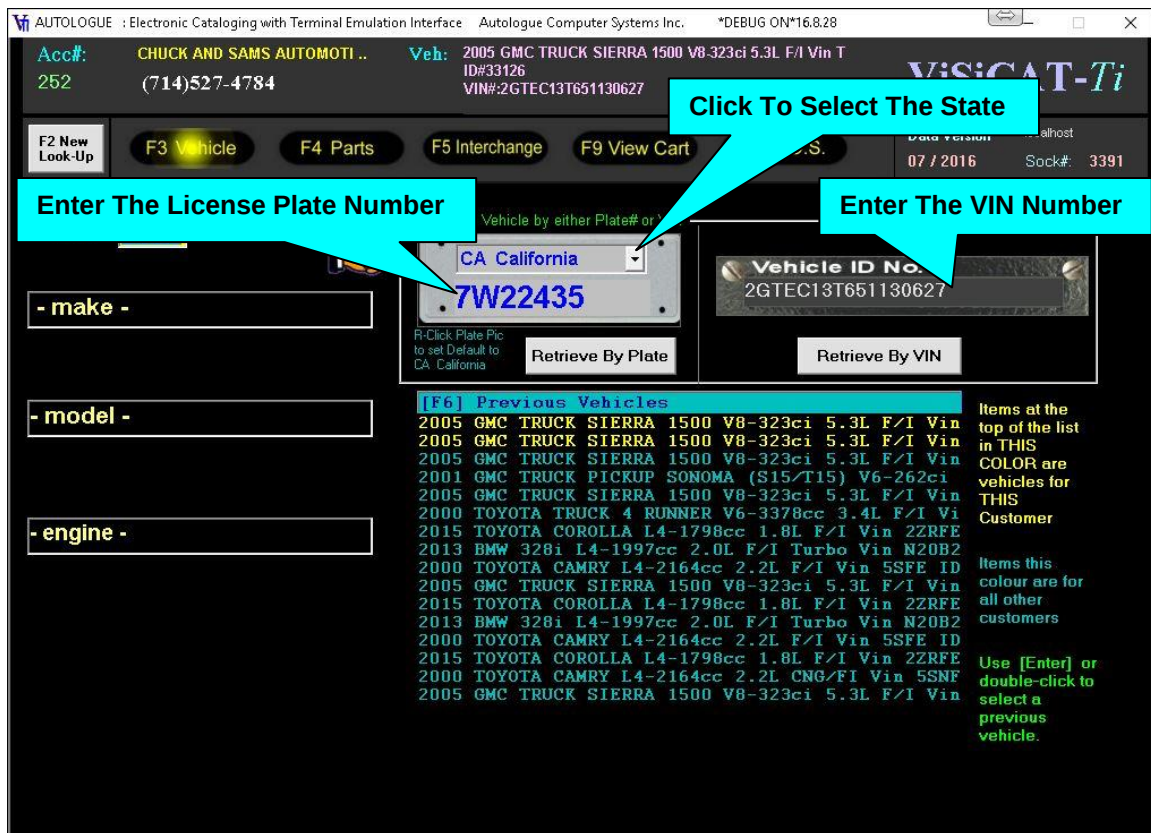

- To scroll forward or backward through the next/ previous group of part numbers for the part type listed, press the **↑** and **↓** arrow keys.

31.3.5.2 Scrolling Forward/Backward Through Part Types Looked Up

- To see the next/previous page of part numbers for the next/previous sub-group part types listed tabs (**A: Belts, Tension, B: Thermostat, Ho**), users can switch between the tabs by entering the tab letter (A/B, etc.), clicking on the desired tab, or pressing the **<Space Bar>** key to scroll forward through the tabs.

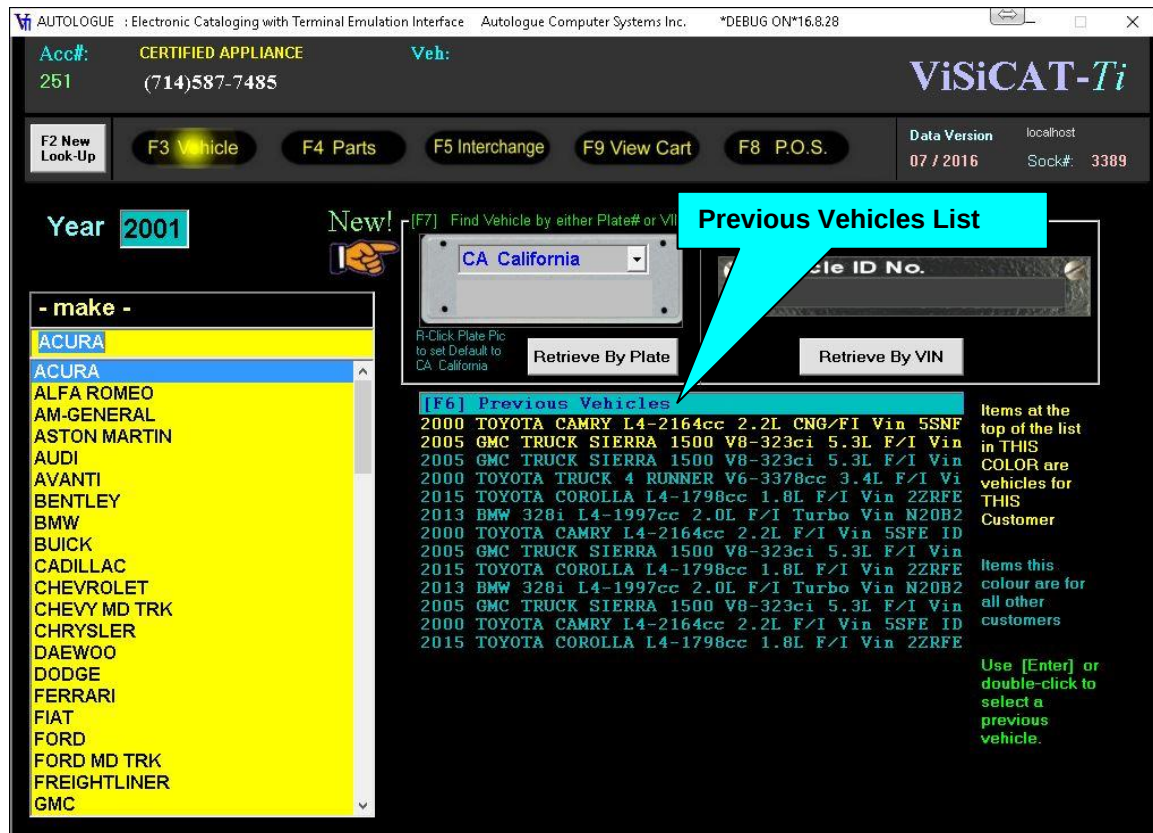

31.3.5.3 Looking Up A Vehicle By License Plate Or VIN Number

- Pressing the <F7> (*Find Vehicle by either Plate# or VIN*) key positions the cursor within the license plate field. To lookup by license plate number, click on the down arrow on the license plate state field and select the license plate state. Then click within the license plate field and enter in the license plate number and click on the grey *Retrieve By Plate* button. If the vehicle was found, the cursor will be positioned within the **Group** field.
- To lookup by Vehicle ID Number, click within the *Vehicle ID No.* field and enter in the VIN number and click on the grey *Retrieve By VIN* button. If the vehicle was found, the cursor will be positioned within the **Group** field.

31.3.5.4 Looking Up A New Car/Previous Vehicle

- Pressing the <F3> (*Vehicle*) key positions the cursor back to the **Year:** prompt. With the cursor positioned within the **Year** field, press the <F6> (*Previous Vehicles*) key to highlight the [F6] *Previous Vehicles* menu selection within the *Previous Vehicles* selection list. Either double click on the desired previous vehicle or use the ↑ and ↓ arrow keys to highlight the desired previous vehicle and press <Enter>.

Previous vehicle lines that are highlighted in yellow means these were previous vehicles for this customer account. These will be listed first in the list. Items highlighted in aqua green means they were previous vehicles for all other customer accounts. They are listed second.

31.3.5.5 Looking Up A New Part Group & Sub-Group

- Pressing the <F4> (Parts) key positions the cursor back to the **Group** prompt.

31.3.5.6 Looking Up A New Engine

- Pressing the <F3> (Vehicle) key when the cursor is positioned within the Group prompt will reposition the cursor back to the Engine drop down selection window prompt.

31.3.5.7 Searching For A Part

- With the cursor positioned at the Group prompt, the user has the ability to search for a specific part (i.e. Oxygen Sensor) by pressing the <F6> (Search) key.

View Cart Button

Shopping Cart Items Selected Area

Preferred Press * to switch Alternates [F6] All Lines

F9 1 GAT K060870 MICROV BELTS AU

- To view or delete items within the shopping car, click on the big white  button or press the <F9> key and the shopping cart window will be displayed as shown:

Qty	L/C	Part Number	Description
* 2005	GMC	SIERRA 1500	V8-323ci 5.3L F/I Vin T
I 1	GAT	38158	DRIVEALIGN AUTO
I 1	GAT	38159	DRIVEALIGN AUTO

Double-Click or press [Del] to remove an item from the shopping cart.

Within this screen the user can delete a specific item or clear all items from the cart.

- To delete a specific item, double click on it or highlight it and press the <Enter> or <Delete> key. To delete all items, click on the peach colored *Clear ALL Items* button or hold down the <Shift> key and press the <Delete> key.

31.3.6 Manufacturer Prices Displayed

When a part number listed is not found within the inventory file, the catalog will try to read the manufacturer prices from the EPS (Electronic Price Sheet) database. If no matching manufacturer price was found within the database, no prices will be displayed under the **LIST**, **Core** and **Cust Pr.** fields and the **Qty OH** field will display **nif** (*Not In File*) as shown below. If a matching manufacturer price was found within the EPS database, the prices would be displayed under the **LIST**, **Core** and **Cust Pr.** fields and the **Qty OH** field will display **EPS** (*Electronic Price Sheet*) as shown:

The screenshot displays the ViSiCAT-Ti software interface. The header shows account information (Acc#: 250, AMERICAN ACRYLIC) and vehicle information (Veh: 2005 GMC SIERRA 1500). The navigation bar includes buttons for F2 New Look-Up, F3 Vehicle, F4 Parts, F5 Interchange, F9 View Cart, and F8 P.O.S. The main table lists parts with columns for Part Description, Part Number, Quantity On Hand (Qty OH), Customer Price (Cust Pr.), List Price (LIST), Core Price (Core), and Years. Two callout boxes highlight specific data points:

- Denotes Pricing From Electronic Price Sheet:** Points to the 'EPS' value in the 'Qty OH' column for part GAT K040378HD.
- Denotes Part Is Not In File:** Points to the 'nif' value in the 'Qty OH' column for part GAT ACK040378HD.

Part Description	Part Number	Qty OH	Cust Pr.	LIST	Core	Years

31.3.7 Scaling The Catalog Screen

The catalog information screen has three different screen heights available to meet the requirements of your particular monitor screen and resolution. Simply moving the size slider within the grey *Height* box will change the scale of the catalog view.

Note: You cannot change the horizontal size. ViSiCAT will remember the scale selection the next time it is started.

The screenshot displays the ViSiCAT-Ti software interface. At the top, the title bar reads "AUTOLOGUE : Electronic Cataloging with Terminal Emulation Interface Autologue Computer Systems Inc. *DEBUG ON*16.7.06". Below this, the header section shows "Acc#: 250" (AMERICAN ACRYLIC), "Veh: 2005 GMC SIERRA 1500", and "V8-323ci 5.3L F/I Vin T". The "ViSiCAT-Ti" logo is on the right. A row of function keys includes "F2 New Look-Up", "F3 Vehicle", "F4 Parts", "F5 Interchange", "F9 View Cart", and "F8 P.O.S.". The "Height" slider is located in the top right corner, with a red box and arrow pointing to it, labeled "Height size slider.".

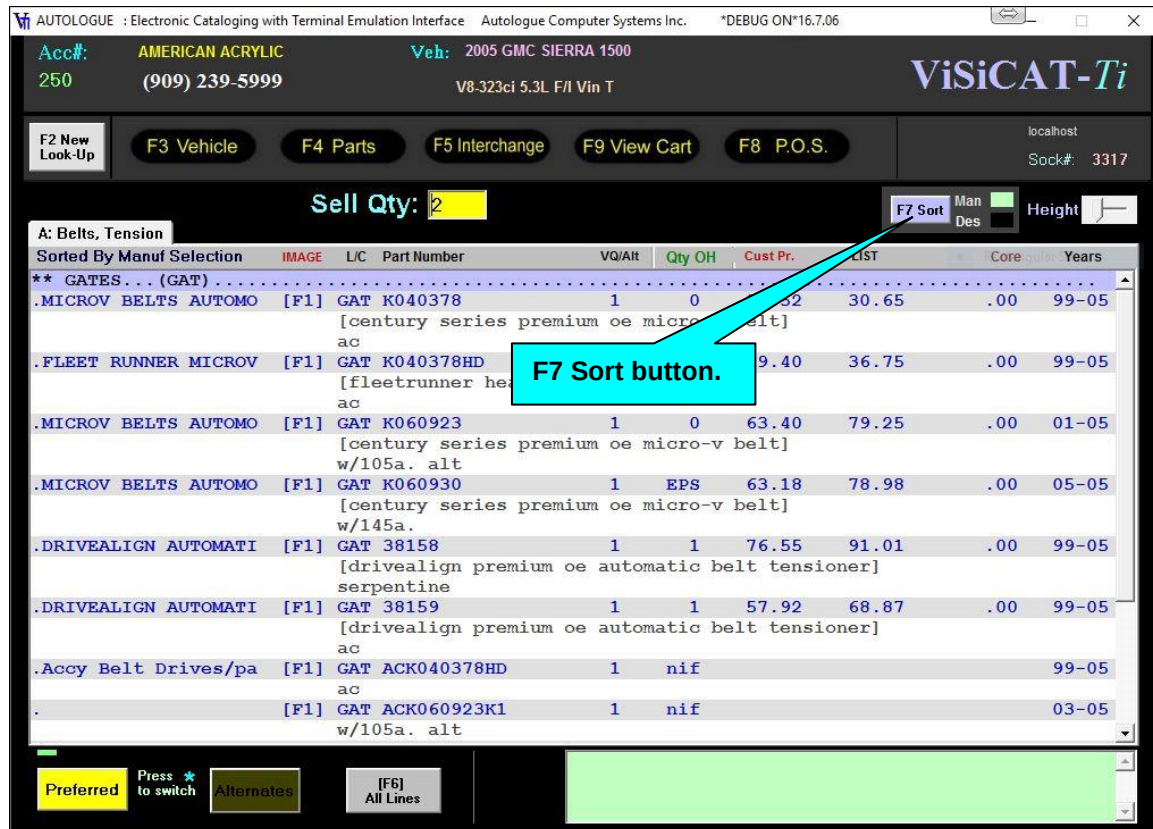

The main catalog area is titled "A: Belts, Tension" and "Sorted By Manuf Selection". It displays a table of parts with columns: IMAGE, L/C, Part Number, VQ/Alt, Qty OH, Cust Pr., LIST, and Years. The table lists various Gates belts, including "MICROV BELTS AUTOMO" and "FLEET RUNNER MICROV".

IMAGE	L/C	Part Number	VQ/Alt	Qty OH	Cust Pr.	LIST	Years
[F1]	GAT	K040378	1	0	24.52	30.65	99-05
[century series premium oe micro-v belt]

[drivealign premium oe automatic belt tensioner]							
[F1]	GAT	38159	1	1	57.92	68.87	99-05
[drivealign premium oe automatic belt tensioner]							
[F1]	GAT	ACK040378HD	1	nif			99-05
[ac]							
[F1]	GAT	ACK060923K1	1	nif			03-05
[w/105a. alt]							

At the bottom, there are buttons for "Preferred", "Press * to switch", "Alternates", and "[F6] All Lines".

31.3.8 Sorting The Catalog Screen

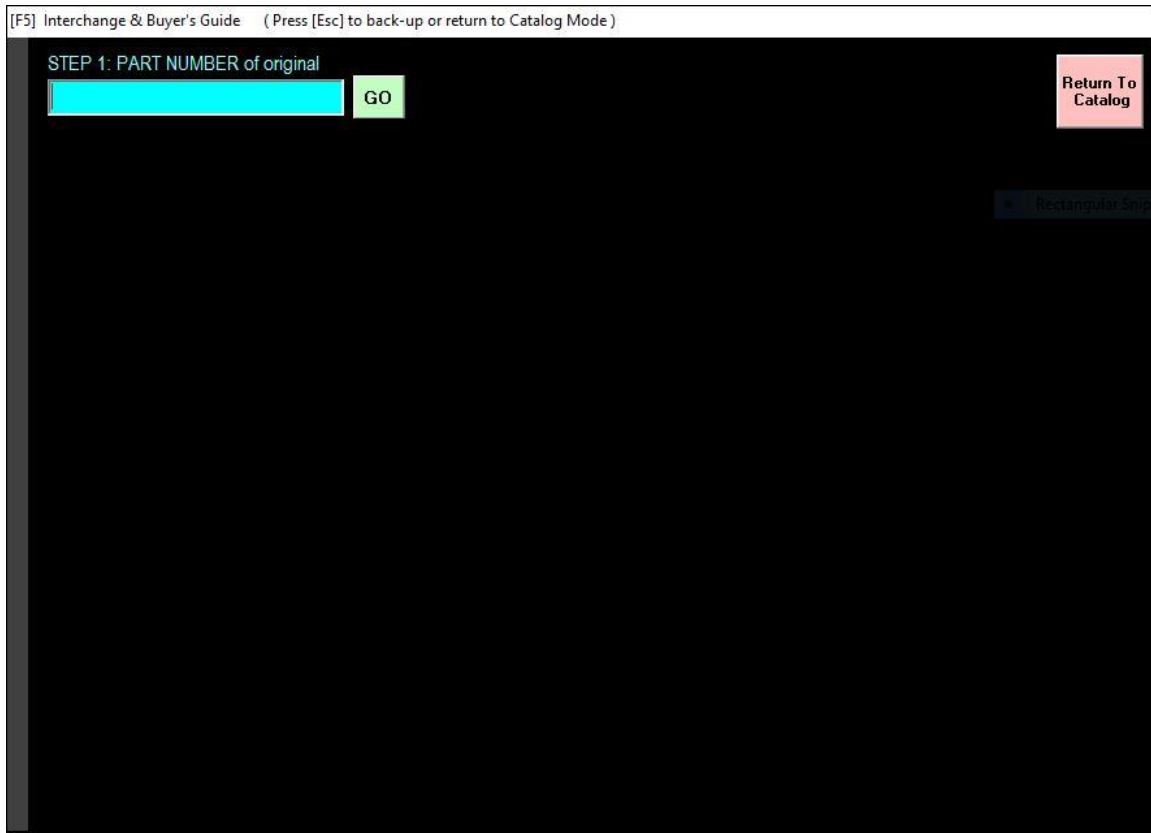

The catalog information screen displays parts that are sorted by manufacturer (*Man*) or by descriptions (*Des*). To toggle between how the screen displays parts looked up, either click on the purple *F7 Sort* button or press the **<F7>** key and the screen will redraw accordingly. ViSiCAT will remember the sort order selection the next time it is started.

31.4 Accessing The Interchange

- Within the catalog, press the **<F5>** (Interchange) key.

The [F5] *Interchange & Buyer's Guide* screen will appear as follows:

[F5] Interchange & Buyer's Guide (Press [Esc] to back-up or return to Catalog Mode)

STEP 1: PART NUMBER of original

GO

Return To Catalog

Rectangular Snip

- With the cursor positioned under the **STEP 1: PART NUMBER of original** prompt, enter the part number to lookup interchange information for and press **<Enter>** or click on the green *GO* button.

The screen will now display a pop up window listing the available manufacturers for the part number entered as shown:

31.5 Updating The Catalog & Interchange

The ViSiCAT Catalog and Interchange information is updated on a monthly basis via DVD media. Listed below are the steps to update the information:

Note: All users need to exit out of cataloging before starting the update process!

- From your PC, insert the *Part-Select™* Catalog into the DVD drive and run the *setup.exe* program.

A series of pop up messages will be displayed on the screen as the catalog information is being loaded. The complete updating process will usually take from 15-30 minutes to complete.

31.6 Keyboard Functions

Key	Function
<Up Arrow>	Move highlight up
<Down Arrow>	Move highlight down
<Enter>	Accept currently highlighted selection
<Page Up>	Scrolls information up the screen
<Page Down>	Scrolls information down the screen
<Esc>	Exits

31.7 Function Keys

The available function keys are displayed at the top of the screen. These will change depending on the screen being displayed. In the lookup screen, the following keys could be displayed:

- <F2>** NEW CAR
This starts a completely new car application lookup.
- <F3>** VEHICLE
Allows the user to enter in new year, make and model for the parts group/sub-group currently displayed.
- <F4>** PARTS
Allows the user to select a new parts group and sub-group being looked up for the same vehicle.
- <F5>** INTERCHANGE
Allows the user to enter a part number to interchange and see buyer's guide information.
- <F6>** PREVIOUS VEHICLES/ALL LINES/SEARCH PART
Allows the user to select from a selection list of previous vehicles looked up system wide.
Allows the user to select from a selection list of all manufacturer lines for the parts group/sub-group currently selected. Allows the user to search for a specific part.
- <F7>** FIND VEHICLES BY PLATE/VIN NUMBER/CHANGE CAR/SORT
Allows the user to lookup vehicles by license plate or VIN number.
Allows the user to change the car application for the selected parts group.
Allows the user to change the way parts are sorted and displayed by either manufacturer or by part description.
- <F8>** P.O.S.
Exits out of the catalog and returns the user back into the point of sale workspace.
- <F9>** VIEW CART
Allows the user to view a pop up window of all the part number items selected.
- <*>** ALTERNATES
Displays the alternates/secondary manufacturer lines selected and then returns to the primary lines.
- <Enter>** Sells or imports the selected part numbers into the shopping cart.
