|---------------------|---|
| <b>Feature:</b>     | <b>A New Accept PDFs Check Box Has Been Added To The Customer Options / Promos /Favorites Menu Edit Screen</b>  |
| <b>Explanation:</b> | A new <i>Accept PDFs</i> check box field option has been added to the <i>Customer Options / Promos /Favorites</i> edit screen within the <i>ePartConnection Setup</i> . By default, all customers are set with this field check marked. If unchecked, then any original invoice PDF, uploaded scanned invoice and PDF statement for the customer will not be uploaded and stored within eOffice. Only the standard invoice and statement information will be uploaded into eOffice. This is necessary for your normal cash account customer numbers used on your management system. |

|---------------------|---|
| <b>Feature:</b>     | <b>The Cataloging Screen Now Displays Thumbnails Pics &amp; Has A Hovering Picture Enlargement Capability</b>   |
| <b>Explanation:</b> | When parts are displayed within the ePartConnection catalog, the screen will now display thumbnail sized pictures in between the Catalog Manufacturer and Description columns. Previously the screen would just display a camera icon. When a picture or cover to cover information is not available for a part, the screen will display a blank field. When there is cover to cover information available without a picture, the screen will display the camera icon. Users have the ability to have the pic enlarged a bit by positioning the mouse pointer (hovering) over the desired pic to see it enlarged. Users can still click on the picture or camera icons to display a pop up window of the cover to cover information for the part. |

**Purchase Order Part Order Policy**

This determines whether a part can be sent on a Purchase Order. Options are provided to exclude non qualifying parts at 'Place Order' time. Parts on the order without sufficient quantity will display a 'delivery time warning'. **AConneX**Acconex does not return stocked status, instead a part number is considered stocked if it has a price.

☐ Any part number can be sent on a Purchase Order (Part numbers not on file will use catalog list price when available)

☒ Part number must be in file (Recommended!) (Part Numbers not on file cannot be sent on the Purchase Order)

☐ Part number must be stocked or have sufficient QOH (Part Numbers not on file (zero order point) cannot be sent on the Purchase Order)

The new Disable Opticat check box field can be check marked to remove the Manufacturers Content Catalog tab screen within ePartConnection.

'1.45' miles ... at 30mph E.T.A. '4.82' minutes

| Invoice              | Driver        | Printed              | Delivery Started     | Delivered | ETA    |
|----------------------|---------------|----------------------|----------------------|-----------|--------|
| <a href="#">5076</a> | Paul Williams | 1/11/2016 1:10:42 PM | 1/11/2016 1:10:42 PM |           | Select |

Click on the Select button and the distance in miles and calculated ETA in minutes based upon 30mph will be shown.

New ETA column.

| Feature:     | Heading Sections Added & Setup Links Reorganized Accordingly   |
|--------------|--|
| Explanation: | <p>Within the <i>ePartConnection Setup</i> webpage, the blue bar menu section that is displayed on the left hand side of the screen has now been reorganized. New heading sections (<b><i>ePartConnection/eSalesBI/eOffice</i></b>) have been created and the various menu links are now listed below each section accordingly so it's easier for users to find and use them. The most frequently used links have been placed first and on down to the least but still keeping similar links grouped together. A few links have also been renamed to better describe their functionality:</p> <ul style="list-style-type: none"> <li>• Non Catalog Part Categories (previously Part Categories)</li> <li>• Manage Hot Links (previously Manage Your Hot Links)</li> <li>• Customer Options / Promos / Favorites (previously Customer Options)</li> </ul> |

| <b>Feature:</b>     | <b>New Searching Capabilities Added To The Customer Options / Promos / Favorites Screen</b>   |
| <b>Explanation:</b> | Using the new searching capabilities that have been added to the <i>Customer Options / Promos / Favorites</i> screen of the <i>ePartConnection Setup</i> webpage, users can now display only the customers that match the entered search criteria. Searches can be based upon customer name, customer number, address, city, state, zip, etc. Basically almost any of the fields. Basic searches can be performed by clicking within the long blank field and entering what to search for (example: orange), then clicking on the drop down field selection list and selecting the specific field to be searched and finally clicking on the <i>Search</i> button. The screen will display only those customers who matched the searching criteria. |

|---------------------|---|
| <b>Feature:</b>     | <b>New Option To Remove Accounts Before Importing</b>   |
| <b>Explanation:</b> | A new <i>Remove accounts before importing</i> check box option has been added to the My Accounts screen when logged into <i>ePartConnection Setup</i> website with salesperson credentials. When check marked, this means that all the existing customer accounts that are setup will first be completely removed when importing a CSV (comma separated value) file of customer accounts for the salesperson. |

| <b>Feature:</b>     | <b>Ability To Disable Stock Orders By Customer</b>  |
| <b>Explanation:</b> | A new <i>Disable Stock Orders?</i> check box field has been added to the <i>Customer Options - Edit</i> screen of the <i>ePartConnection Setup</i> webpage. If check marked, the Stock Order menu tab will not be displayed when the user logs into ePartConnection and therefore cannot create stock orders. |

|---------------------|--|
| <b>Feature:</b>     | <b>A New Manage Alerts/Notifications Menu Link Has Been Added</b>  |
| <b>Explanation:</b> | <p>The new <i>Manage Alerts/Notifications</i> webpage allows you to setup specific sales criteria based upon the following:</p> <ul style="list-style-type: none"> <li>• Customers not purchasing a specific dollar amount within a specific amount of days or haven't made a purchase in a specific amount of days.</li> <li>• Customers sales percentage falls below their daily average for a specific amount of days compared to the last N number of days.</li> <li>• Customers that are returning parts over a specific percentage of their total purchases for a specific amount of days.</li> </ul> <p>Each of these options can be setup for all or specific salesmen. These options are alerts/notifications that get displayed through the eSales BI login.</p> |

The screenshot shows the ePART connection.com interface. On the left is a sidebar with various menu items. A red callout box with the text "New Manage Alerts/Notifications menu link." points to the "Manage Alerts / Notifications" link in the sidebar. The main content area displays a form for setting up alerts/notifications. The form includes sections for "Notification 2", "Notification 3", and "Notification 4". Each section has a "Priority" dropdown (set to "High"), a text input field, and a "Submit" button. The "Notification 2" section also has a "Joe Owner" dropdown and an "Add new salesman" button. The "Notification 3" section has a "Joe Owner" dropdown and an "Add new salesman" button. The "Notification 4" section has a "Joe Owner" dropdown and an "Add new salesman" button. The sidebar menu items include: ePart Discounts, Sales Reports, Open Order Report, Connection Analysis, Customer Remote IP, Independent Warehouse Stock Check, Retail ePart Options, Long Location Names, Multi-Location Ordering, Manage ToolWEB Line Codes, PartsLink Setup, Help and Suggestions, eSalesBI, Store Name and Address, Manage Logs, Manage Users / Roles, Customer Options / Promos / Favorites, Manage Alerts / Notifications (highlighted), Manage Goals, Sales Groups, and Manage Opportunities.

|                     |  |
|---------------------|--|
| <b>Feature:</b>     | <b>A New Manage Opportunities Menu Link Has Been Added</b>   |
| <b>Explanation:</b> | The new <i>Manage Opportunities</i> webpage allows you to direct your customers to specific webpages/websites to promote special events, special pricing, problem solving solutions, etc. These opportunities must be linked to a webpage/website for eSales BI. |

| <b>Feature:</b>     | <b>A New Sales Groups Menu Link Has Been Added</b>  |
| <b>Explanation:</b> | The new <i>Sales Groups</i> webpage allows you to setup specific line codes within a sales group for the eSales BI. You would first create a sales group label by clicking within the blank field under the <i>Group</i> column heading, enter in a sales group name and then click on the <i>Add</i> and then the <i>Save</i> buttons. Next click on the <i>Select</i> button of the sales group line to setup line codes for. To add a line code, click within the blank field under the <i>Line Code</i> column heading, enter in a line code, click on the <i>Add</i> and then the <i>Save</i> buttons. Continue this process for all the line codes to be designated under a specific sales group. |

| <b>Feature:</b>     | <b>New Option To Sort Catalog By Part Description</b>  |
| <b>Explanation:</b> | A new <i>Sort Catalog By Part Description</i> check box has been added under the <i>Misc options</i> section within the <i>Store Name and Address</i> tab section of the <i>ePartConnection Setup</i> webpage. When check marked, parts looked up within the catalog are sorted by part type. When unchecked, the parts are sorted by manufacturer as they always had. By default, the new sort by part description option is checked. |

| <b>Feature:</b>     | <b>Fleet Survey Tab Heading Has Been Renamed To Favorites</b>  |
| <b>Explanation:</b> | When logged into ePartConnection, the tab heading that use to say <i>Fleet Survey</i> has now been renamed to <i>Favorites</i> . All screen references to <i>Fleet Survey</i> will now say <i>Favorites</i> throughout the ePartConnection website. Within the <i>Favorites</i> screen, a new <i>Edit</i> button has been added that gives you the ability to edit the favorite's vehicle information. |

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Now Add A Logo Specifically For The ePart Mobile Application</b>  |
| <b>Explanation:</b> | A new button has been added within the <i>Manage Logo</i> tab section of the <i>ePartConnection Setup</i> webpage. The new button is used to specifically upload a logo image that is specific to the ePart mobile application. This is a separate logo from the website logo. This was needed to have a smaller cleaner version that displays nicer on the mobile application. The recommended logo size is 125 pixels x 125 pixels. |

The screenshot shows the 'Manage Logo' section of the ePartConnection Setup webpage. On the left is a navigation menu with links such as 'Logoff', 'Store Name and Address', 'Delivery Options', 'Manage MCL', 'Catalog Manufacturer Names', 'Catalog Part Number Prefix/Suffix', 'Manage Logo', 'Manager Users / Roles', 'Customer Options', 'Retail Mode', 'Independent Warehouse Stock Check', 'Part Categories', 'Manage Your Hot Links', 'Long Location Names', 'Multi-Location Ordering', 'Sales Reports', 'ePart Discounts', 'Open Order Reports', 'Customer Remote IP', 'Connection Analysis', 'ePart Messages', and 'Manage ToolWEB Line Codes'. The main content area displays two 'Submit' buttons. The top button is labeled 'Click here to edit your Web logo'. The bottom button is labeled 'Click here to edit your Mobile logo'. A red callout box points to the bottom button with the text: 'A new button has been added to add a separate logo for the mobile application.'

Add Group

Set Display Mode for Favorites: [Large Picture Mode ▼] Set Sub Categories to Large Picture Mode

Camera mode to display an icon that will show the picture, big picture mode shows the picture inline with the results.

Sort Parts for Group Favorites: ☒

If selected, a non catalog parts & accessories category will be shown below the catalog years when a customer logs in.

Categories Under 'Favorites'

| Category Name       | Move Up | Move Down | Edit Category | Delete Category |
|---------------------|---------|-----------|---------------|-----------------|
| 2000 Toyota Camry   | Move Up | Move Down | Edit Category | Delete Category |
| 2000 Toyota 4Runner | Move Up | Move Down | Edit Category | Delete Category |
| 1999 Ford           | Move Up | Move Down | Edit Category | Delete Category |
| 1998 Ford Mustang   | Move Up | Move Down | Edit Category | Delete Category |
| My Inventory        | Move Up | Move Down | Edit Category | Delete Category |

No Parts Under 'Favorites'

You may use multiple drill downs with non catalog parts & accessories. ie: chemicals->cleaners->fluids->oil

You can add a manufacture code and part number with the "Add Part" button, the description will come from the catalog. If you don't override it.

Import a group from your part category templates to this current group

Show Templates

☒ Merge into Current Group

☐ Delete Current Group (If you are at the top of your non catalog parts & accessories **all** of your non catalog parts & accessories will be deleted!)

Choose File

No file chosen

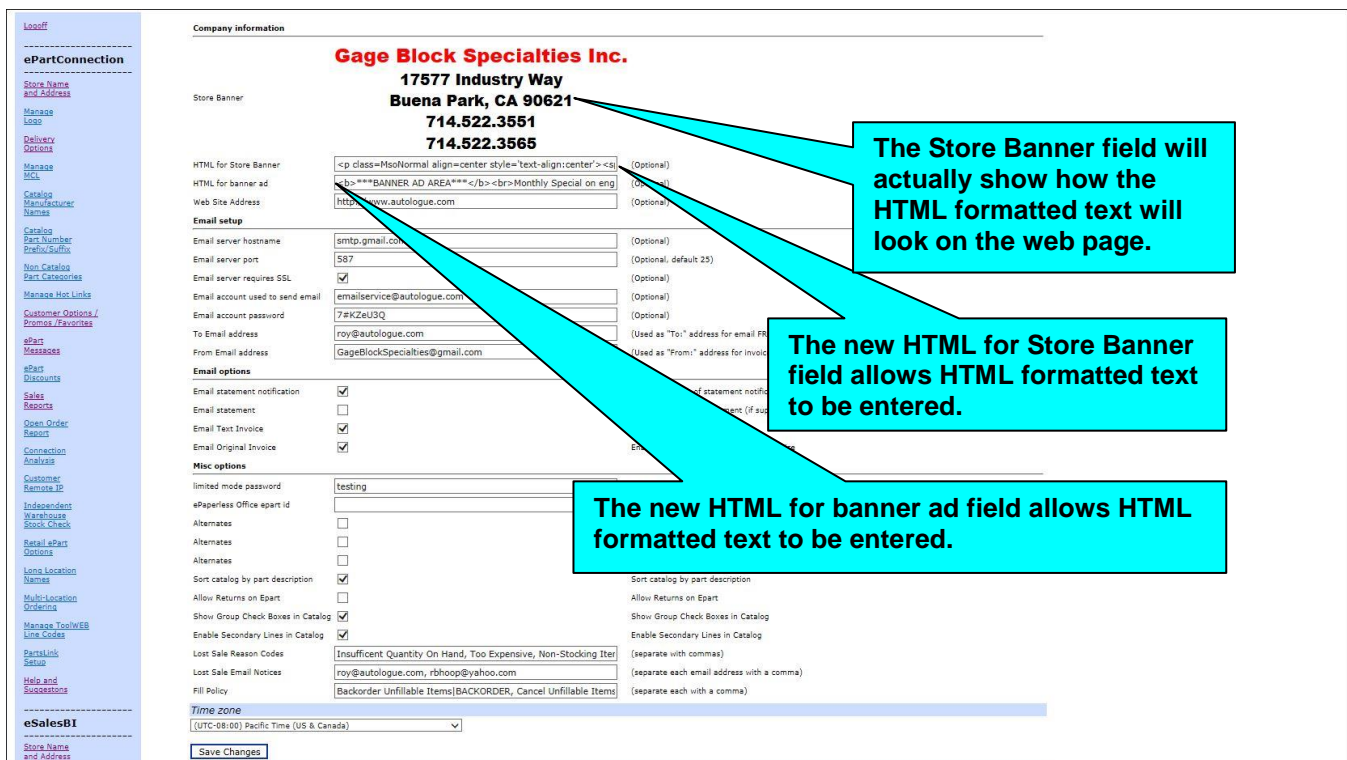

Import File

Export File

View Sample Import File

You can import a excel file if you save it as a csv file. The first column will contain a MFG code, the second column will contain the part number and the third, (optional) column is the additional description, the fourth (also optional) column is a Path where the part should go such as "Chemicals/Cleaners". Select the "browse" button and then click the import button. All items in your csv file will import to the currently selected group. Click view sample to see what the format looks like.

|---------------------|--|
| <b>Feature:</b>     | <b>Greater Flexibility To Now Center &amp; Format The Store Banner &amp; Banner Ad Areas Of The ePartConnection Screen Using HTML</b>  |
| <b>Explanation:</b> | Within the <i>Customer Options – Store Name and Address</i> tab screen, you can now paste in formatted HTML store banner text information within the new <i>HTML for Store Banner</i> and <i>HTML for banner ad</i> fields. Because these fields allow for HTML, this gives you greater flexibility to have the banner text information displayed larger, centered, in color and can include URL links and pictures. The Store Banner area of the screen is normally used for entering static store name, address & phone number information. The Banner Ad area of the screen is normally used for entering changeable advertising information such as specials but could also include an animated GIF, picture of the business, staff, etc., |

|---------------------|---|
| <b>Feature:</b>     | <b>New Options Added To Allow/Disallow The Emailing Of Invoices</b>   |
| <b>Explanation:</b> | Two new <i>Email invoice</i> options have been added. The first will determine whether to email a text version of the invoice. The second will determine whether to email a copy of the original PDF and/or scanned version to the customer. Emails are sent out automatically whenever an invoice is finalized from the management system and is uploaded into eOffice. An email is also automatically sent out whenever an invoice is scanned and uploaded via the <i>Autologue Invoice Uploader</i> program. This functionality is predicated upon the customer having entered email addresses for invoices and statements within the setup tab page of <i>ePaperless Office</i> . |

### Purchase Order Part Order Policy (Update June 2006)

This determines whether a part can be sent on a Purchase Order. Options are provided to exclude non qualifying parts at 'Place Order' time. Parts on the order without sufficient quantity will display a 'delivery time warning'. AConneX:AcconneX does not return stocked status, instead a part number is considered stocked if it has a price.

- ☐ Any part number can be sent on a Purchase Order (Part numbers not on file will use catalog list price when available)
- ☐ Part number must be in file (!Recommended!) (Part Numbers not on file cannot be sent on the Purchase Order)
- ☐ Part number must be stocked or have sufficient QOH (Part Numbers not on file (zero order point) cannot be sent on the Purchase Order)
- ☒ Part number must have sufficient QOH (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)
- ☐ Part number must have sufficient QOH based upon all locations (Useful only with Multistore systems) (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)
- ☐ Part number must have sufficient QOH based upon all locations or Independent Warehouse (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

**2 new email invoice check box options have been added to determine whether to allow/disallow the emailing of specific types of invoices to customers.**

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>A New Manage ToolWEB Line Codes Screen Has Been Added</b>  |
| <b>Explanation:</b> | A new <i>Manage ToolWEB Line Codes</i> menu tab has been added to <i>ePartConnection Setup</i> webpage. This is the area where you would enter your specific manufacturer line codes so they match the parts being displayed out of the ToolWeb website link. |

Purchase Order Part Order Policy (Update June 2006)

This determines whether a part can be sent on a Purchase Order. Options are provided to exclude non-qualifying parts at 'Place Order' time. Parts on the order without sufficient quantity will display a 'delivery time warning'. AConneX/AConneX does not return stocked status, instead a part number is considered stocked if it has a price.

☐ Any part number can be sent on a Purchase Order  
(Part numbers not on file will use catalog list price when available)

☒ Part number must be in file (!Recommended!)  
(Part Numbers not on file cannot be sent on the Purchase Order)

☐ Part number must be stocked or have sufficient QOH  
(Part Numbers not on file (zero order point) cannot be sent on the Purchase Order)

☐ Part number must have sufficient QOH  
(Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

☐ Part number must have sufficient QOH based upon all locations  
(Useful only with Multistore systems)  
(Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

☐ Part number must have sufficient QOH based upon all locations or Independent Warehouse  
(Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

Catalog Display Option

☐ Display all parts  
☒ Display only stocked parts  
☐ Display only parts with QOH > 0  
☐ Display only in file parts

☒ Allow override

Description Section

☐ Use Catalog Description

Always show Quantity Option

☒ Show the actual Quantity On Hand (QOH), Option  
☐ Show actual QOH or vehicle quantity  
☐ Show vehicle quantity as your QOH

Multi Store other location QOH display

Notice: The Independent Warehouse

☐ The header is (WHSE QOH).  
The QOH is the total of all locations EXCEPT the one you are logged into.  
This is the same as WHSE QOH with a different label.

☒ The header is (QOH Other Locations).  
The QOH is the total of all locations EXCEPT the one you are logged into.  
This is the same as WHSE QOH with a different label.

☐ The header is (QOH All Locations).  
The QOH is the total of all locations INCLUDING the one you are logged into.

☐ Do not display this Column.  
Use this selection for Single Store systems.

☐ The header is (WHSE QTY).  
The QOH is the total of all locations INCLUDING the one you are logged into.

AConneX Purchase Order Release Code

Default Release Code

☒ Regular (Prints on Stocking Order Printer)

**A new Allow override check box option has been added within the Catalog Display Option Section.**

|                     |  |
|---------------------|--|
| <b>Feature:</b>     | <b>A New Display All Parts Button Is Now Optionally Displayed Within The Cataloging Screens</b>  |
| <b>Explanation:</b> | When the cataloging screen displays parts for the selected category/group, a new <i>Display All Parts</i> button could possibly be displayed to the right of the <i>Record Lost Sales</i> button. When clicked on, the catalog parts screen will be redrawn and will include all parts that were previously filtered out (not in the inventory file and/or have a quantity on hand (QOH) of zero or below). The button would then change to display either <i>Display Stocked Parts</i> or the <i>Display OH &gt; 0</i> based upon which catalog display option is set. The button will also turn orange only when there is no part information initially displaying but there is parts information to be displayed. |

|---------------------|---|
| <b>Feature:</b>     | <b>ePart Catalog Information Is Now Grouped By Part Description And No Longer By Manufacturer</b>   |
| <b>Explanation:</b> | Previously when parts information was displayed within the ePart Catalog screen for a vehicle application, the information was grouped by specific manufacturer. It is now grouped by catalog description which makes it easier to lookup and sell. |

Parts information is now displayed and grouped together by Catalog Description.

| Feature:     | Default Fill Policy Options  |
|--------------|--|
| Explanation: | A new <i>Fill Policy</i> field has been added within the <i>Store Name and Address</i> section of the <i>ePartConnection Setup</i> web page. This allows management to setup specific fill policy descriptions and the order in which they are displayed within the <i>Fill Policy Request</i> field when finalizing an ePartConnection order. To set the default fill to be backorder and then cancel, enter the following values within the <i>Fill Policy</i> field: <b>Backorder Unfillable Items BACKORDER,Cancel Unfillable Items CANCEL</b> . |

### Purchase Order Part Order Policy (Update June 2006)

This determines whether a part can be sent on a Purchase Order. Options are provided to exclude non qualifying parts at 'Place Order' time. Parts on the order without sufficient quantity will display a 'delivery time warning'. **AConneX:AConneX** does not return stocked status, instead a part number is considered stocked if it has a price.

☐ Any part number can be sent on a Purchase Order (Part numbers not on file will use catalog list price when available)  
☐ Part number must be in file (!Recommended!) (Part Numbers not on file cannot be sent on the Purchase Order)  
☐ Part number must be stocked or have sufficient QOH (Part Numbers not on file (zero order point) cannot be sent on the Purchase Order)  
☒ Part number must have sufficient QOH (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)  
☐ Part number must have sufficient QOH based upon all locations (Useful only with Multistore systems) (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)  
☐ Part number must have sufficient QOH based upon all locations or Independent Warehouse (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

Enter the order and description of the Fill Policy here.

|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Now Have All Lost Sales Sent To An Email Address</b>  |
| <b>Explanation:</b> | Users now have the ability to setup specific email addresses within the new <i>Lost Sale Email Notices</i> field of the <i>Store Name and Address</i> tab screen. Once setup, any lost sales that are generated through the ePartConnection website will automatically send an email that will contain the customers' number and name, the type of lost sale, the vehicle information (make/model/engine) and the part number and quantity. |

| <b>Feature:</b>     | <b>User's Now Have The Ability To Record Lost Sales Within The Non Catalog Parts &amp; Accessories, Stock Check &amp; Stock Order Page Screens</b>   |
| <b>Explanation:</b> | Two new fields have been added to the ePartConnection non catalog parts & accessories, stock check & stock order screens. A new <i>Lost Sales Reasons</i> selection list and <i>Record Lost Sales</i> button can be used to give a reason and actually record the lost sale for any parts that are check marked. |

Enter the Part Number only  
or  
Manufacturer / Part Number  
Example: PH8A or FRA/PH8A  
Some Stores Require the Manufacturer.  
ePart Interchange requires Part Number Only.

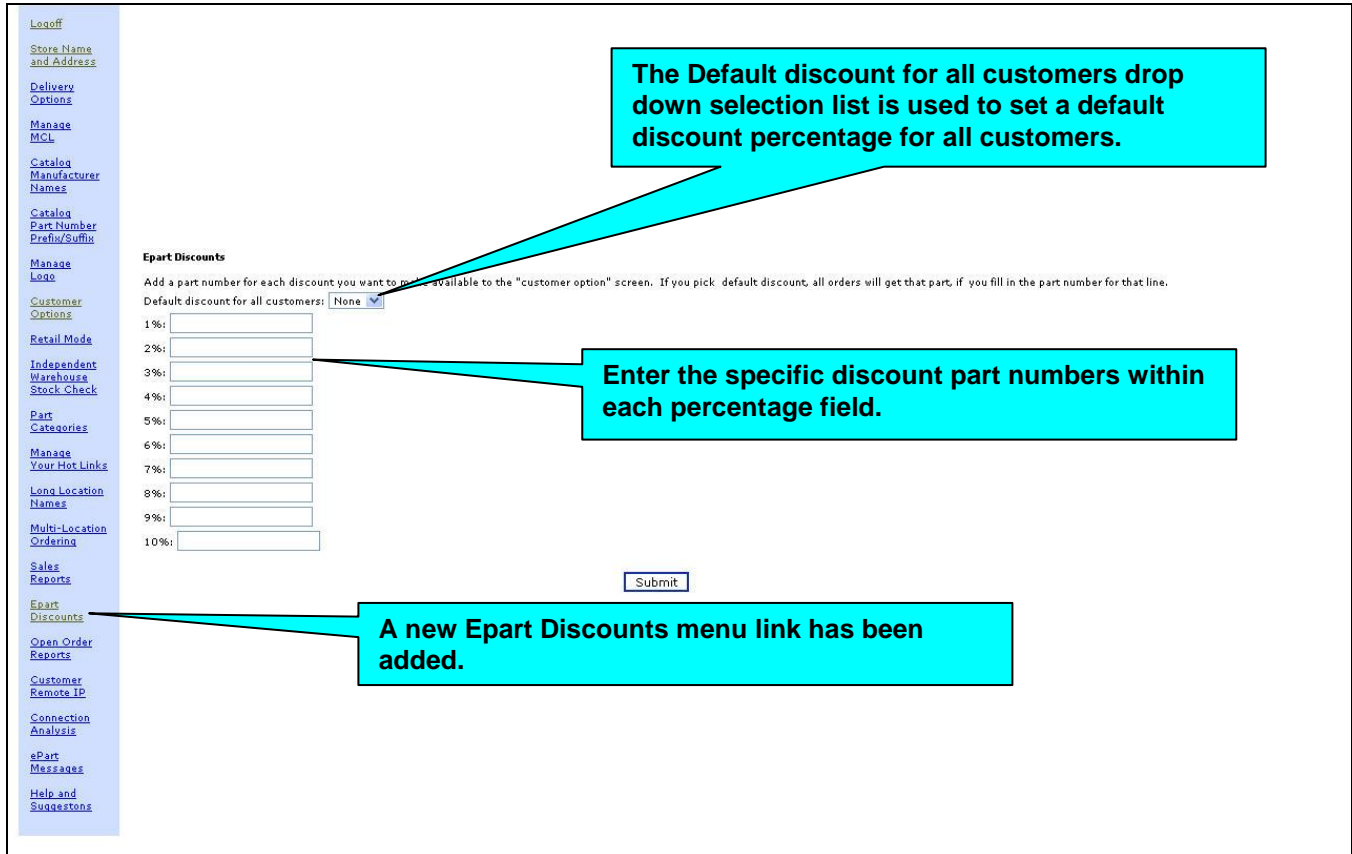

Lost Sales Reasons: Insufficient Quantity On Hand

| Mfg | Part Number | Description       | List  | Cost  | Core | QOH Other Locations | QOH | Qty |
|-----|-------------|-------------------|-------|-------|------|---------------------|-----|-----|
| BCA | A1          | TAPER BEARING SET | 29.84 | 10.08 | 0.00 | 7                   |     |     |

**First select a reason from the new Lost Sale Reasons drop down selection list.**

**Then click on the Record Lost Sales button to record the lost sale.**

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Setup ePart Discounts</b>   |
| <b>Explanation:</b> | A new <i>Epart Discounts</i> menu tab screen has been added within the <i>ePartConnection Setup</i> . This allows management to setup specific discount part numbers and also to set a default discount percentage for all customers. |

The screenshot shows the 'Epart Discounts' setup screen. On the left is a navigation menu with links: Logoff, Store Name and Address, Delivery Options, Manage MCL, Catalog Manufacturer Names, Catalog Part Number Prefix/Suffix, Manage Logo, Customer Options, Retail Mode, Independent Warehouse Stock Check, Part Categories, Manage Your Hot Links, Long Location Names, Multi-Location Ordering, Sales Reports, **Epart Discounts** (highlighted), Open Order Reports, Customer Remote IP, Connection Analysis, ePart Messages, and Help and Suggestions.

The main content area is titled 'Epart Discounts' and includes the instruction: 'Add a part number for each discount you want to make available to the "customer option" screen. If you pick default discount, all orders will get that part, if you fill in the part number for that line.' Below this is a dropdown menu for 'Default discount for all customers:' with 'None' selected.

There are ten input fields for discount percentages from 1% to 10%. Callouts highlight the following features:

- The Default discount for all customers drop down selection list is used to set a default discount percentage for all customers.** (Pointing to the 'None' dropdown)
- Enter the specific discount part numbers within each percentage field.** (Pointing to the input fields)
- A new Epart Discounts menu link has been added.** (Pointing to the 'Epart Discounts' link in the navigation menu)

A 'Submit' button is located at the bottom right of the form.

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Setup Specific Epart Discounts By Customer</b>  |
| <b>Explanation:</b> | A new <i>ePart Discount</i> drop down selection list field has been added to the <i>Customer Options - Edit</i> menu tab screen. Each customer can use the default discount setup for all customers or be assigned a specific discount. |

The ePart Discount selection list field is used to setup specific discounts by customer.

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>New Favorites Button Has Been Added To The Customer Options - Edit Screen Page</b>   |
| <b>Explanation:</b> | Users now have the ability to setup <i>Favorites</i> Part Categories for specific fleet vehicles by customer. The part category names would be for specific fleet vehicles (i.e. <i>2000 Toyota 4Runner</i> ). Once the specific part category is entered, sub-categories and also be entered and then the specific part numbers for the vehicle can be added within each specific sub-category. This makes it really easy for customers to quickly order parts for their specific fleet vehicles. This functionality works exactly like the normal Parts Categories except a new <i>Favorites</i> tab will be displayed on the menu bar for the customer when logged in. |

| <b>Feature:</b>     | <b>New Catalog Display Options To Limit The Parts Displayed Within ePartConnection</b>  |
| <b>Explanation:</b> | A new <i>Catalog Display Option</i> section has been added to the <i>Store Name and Address</i> tab screen within the <i>ePartConnection Setup</i> . By default, the <i>Display all parts</i> option will be enabled. Users can also select the <i>Display only stocked parts</i> or <i>Display only parts with QOH &gt; 0</i> options. This will limit the parts displayed within the ePartConnection catalog accordingly. |

### Purchase Order Part Order Policy (Update June 2006)

This determines whether a part can be sent on a Purchase Order. Options are provided to exclude non qualifying parts at 'Place Order' time. Parts on the order without sufficient quantity will display a 'delivery time warning'.  
**AConneX:** AconneX does not return stocked status, instead a part number is considered stocked if it has a price.

☐ Any part number can be sent on a Purchase Order (Part numbers not on file will use catalog list price when available)  
☒ Part number must be in file (!Recommended!) (Part Numbers not on file cannot be sent on the Purchase Order)  
☐ Part number must be stocked or have sufficient QOH (Part Numbers not on file (zero order point) cannot be sent on the Purchase Order)  
☐ Part number must have sufficient QOH (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)  
☐ Part number must have sufficient QOH based upon all locations (Useful only with Multistore systems) (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)  
☐ Part number must have sufficient QOH based upon all locations and warehouse (Part Numbers with insufficient QOH cannot be sent on the Purchase Order)

### Catalog Display Option

☐ Display all parts  
☒ Display only stocked parts  
☐ Display only parts with QOH > 0

**The new Catalog Display Option section allows users to define what parts information to display within the ePartConnection Catalog.**

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Display Mode And New Part Sorting Option Can Now Be Setup For Specific Parts Categories</b>  |
| <b>Explanation:</b> | You now have the ability to set the display mode (large picture/camera icon) and whether the parts are sorted by specific group. Previously the setting of the display mode was applied for all groups and sub-groups and parts were automatically sorted. A new Sort Parts for Group Categories check box field has been added to the <i>Part Categories</i> tab screen within the <i>ePartConnection Setup</i> . When unchecked, the parts will be displayed in the order in which they were entered or imported. |

Show Non Catalog Parts & Accessories on Login: ☒ If selected, a non catalog parts & accessories category will be shown below the catalog years when a customer logs in.

[Download Backup File](#)

The Save file must be imported as a "csv" file when view the "Top Level" group. Select the option to "Delete Current Group" and all of your non catalog parts & accessories will be restored. If you have uploaded any pictures to our sever, they will be lost. If you chose to store pictures offsite via a "URL", all your pictures will still be visible after import.

Select :

[Save Changes To Non Catalog Parts & Accessories Names, Descriptions, and Picture Urls](#)

Add New Category to "Main Categories"  [Add Group](#)

Set Display Mode for Main Categories:  Camera mode to display an icon that will show the picture, big picture mode shows the picture inline with the results.

Sort Parts for Group Main Categories: ☒ If selected, a non catalog parts & accessories category will be shown below the catalog years when a customer logs in.

Categories Under "Main Categories"

| Category Name | Move Up | Move Down | Edit Category | Delete Category |
|---------------|---------|-----------|---------------|-----------------|
| Test Category | Move Up | Move Down | Edit Category | Delete Category |
| Accessories   | Move Up | Move Down | Edit Category | Delete Category |
| Oils/Lubs     | Move Up | Move Down | Edit Category | Delete Category |
| Tools         | Move Up | Move Down | Edit Category | Delete Category |
| Cooling       | Move Up | Move Down | Edit Category | Delete Category |
| Chemicals     | Move Up | Move Down | Edit Category | Delete Category |
| Supplies      | Move Up | Move Down | Edit Category | Delete Category |

Mfg  Part Number  Additional Description (optional, but if you don't have a description here, customers can't search by the description) [Add Part](#)

Add A Part to Main Categories

No Parts Under "Main Categories"

You may use multiple drill downs with your non catalog parts & accessories, ie; chemicals->cleaners->fluids->lubricants->etc.  
You can add a manufacture code and part number with the "Add Part" button, the description will come from your management system if you don't override it.

Import a group from our part category templates to this current group

[Show Templates](#)

☒ Merge into Current Group  
☐ Delete Current Group (if you are at the top of your non catalog parts & accessories **all** of your non catalog parts & accessories will be deleted!)

[Browse...](#) [Import CSV File](#) [View Sample Import File](#)

You can import a excel file if you save it as a csv file. The first column will contain a MFG code, the second column must contain the part number and the third, (optional) column is the additional description, the fourth (also optional) column is a Path where the part should go such as "Chemicals/Cleaners/". Select the "browse" button and then click the import button. All items in your csv file will import to the currently selected group. Click view sample to see what the format looks like.

**All Categories Now Have The Set Display Mode & Sort Parts For Group Options.**

|                            |  |
|----------------------------|--|
| <b><u>Feature:</u></b>     | <b>Option To Now Remove The Show Secondary Lines Within ePartConnection</b>  |
| <b><u>Explanation:</u></b> | You now have the ability to disable the <i>Show Secondary Lines</i> button from displaying within the ePartConnection catalog. A new Enable Secondary Lines in Catalog check box field has been added to the <i>Store Name and Address</i> tab screen within the <i>ePartConnection Setup</i> . When unchecked, the <i>Show Secondary Lines</i> button will not be displayed within the ePartConnection catalog. |

| <b>Feature:</b>     | <b>Ability To Setup A Limited Access Login Password</b>  |
| <b>Explanation:</b> | A new Limited Mode Password field has been added to the <i>Store Name and Address</i> tab screen within the <i>ePartConnection Setup</i> . When setup, this allows users to log into the <i>ePartConnection Setup</i> website and only have access to the <i>Sales Reports</i> tab screen. This is useful to grant access for your outside salesman to review customer sales activity. |

|---------------------|---|
| <b>Feature:</b>     | <b>A New Send Mail to All Users Button Has Been Added</b>   |
| <b>Explanation:</b> | <p>To setup a formatted message to send to all of your installer customer accounts, log into the <i>ePartConnection</i> setup web page and left click on the <i>ePart Messages</i> link. Left click on the new <i>Send Mail to All Users</i> button. Left click within the <i>Subject:</i> field and enter in a subject line. Left click within the message area and enter in your desired message. Portions of entered message can be bold and italicized. Paragraphs can be setup to be bulleted or numbered. Once your message is entered and formatted to your satisfaction, left click on the <i>Send</i> button. The next time any of your customers log into <i>ePartConnection</i>, a new red tab labeled <i>New Msgs</i> will then be displayed alerting the customer that there is a new message to be viewed. They would then left click on the tab to see a list of messages. They would then left click on the <i>Read Message</i> button displayed to the right of the specific message to be viewed.</p> |

To send a message to a group of your customers, create a new group and then add all of the customer numbers you would like to that group. Only customers who have logged in to your epart before will be allowed in a group list. You can add or remove customers from a group any time you would like to.

You can send a message to a single customer by selecting "send message" when looking at the customers in a given group. If you would like to send a message to a customer not assigned to a group, you can use the "View All Customers" listing to do so.

Your customers will be able to see messages for them when they log in to epartconnection.com and if they choose to reply to your message, you will receive their reply as an email to you.

## Hot Link Button Setup

These Hot Link buttons will appear to the left of the screen once the installer logs into ePart. You can create a new button by clicking the "Add a New Link" button. After you add a button, change the text in the column "ButtonName" to the text you want your installers to see. After selecting the button type (or the site your button goes to) you can click on "Save" to save your changes. If you later decide you no longer want a button, you can click on the "Delete" to remove an item.

Each Hot Link Button has three options to choose from:

- ♦ **"Predefined Web Site" means:**  
ePartConnection.com has pre-selected national companies that supply specialty parts via the internet. With a mere click through your site, they will rebate you between 3 to 8 percent according to the ePART community volume. The Vendor is going to ask for a credit card from the installer to create an open account. The Web Vendor will handle all transactions and returns, including phone calls.
- ♦ **"Category Groups" means:**  
You can setup a Hot Link button that describes and directs your installer to one or many category groups that you wish to promote, i.e.: Monthly Specials, Chemicals, Accessories etc.
- ♦ **"Custom Web Sites" means:**  
You can link to any website.

**Master ID For Jobber Links:** \_\_\_\_\_ Now the jobber links for your main store, type in your main store's epart id here, and the click save. Delete the id and click save to have your own independent jobber links.

| Button Name         | Predefined Web Site | Category Group | Custom Web Site        | Text Size | Fore Color | Back Color | Delete | Move Up | Move Down |
|---------------------|---------------------|----------------|------------------------|-----------|------------|------------|--------|---------|-----------|

|---------------------|--|
| <b>Feature:</b>     | <b>Ability To Now Select The Default Release Code For AConneX Orders &amp; Assign Specific Shipping Codes For Stocked/Non-Stocked Orders</b>   |
| <b>Explanation:</b> | The default AConneX release code can now be setup within the ePartConnection Setup. The selected code will now be the default for a new drop down when an AConneX order is being generated through ePartConnection. The installer can now select the specific release code he wants to send. You can now setup the shipping code defined by your supplier for both stock/non-stocked orders. |

**Always show Quantity Option**

☒ Show the actual Quantity On Hand (QOH). Option(0)  
☐ Show actual QOH or vehicle quantity, whichever is greater. Option(1)  
☐ Show vehicle quantity as your QOH (hides true QOH ). Option(2)

**Multi Store other location QOH display Option**  
*Notice: The independent Warehouse (auto ordering) is not involved with this option.*

☒ The header is (WHSE QOH).  
 The QOH is the total of all locations EXCEPT the one you are logged into.  
 This is the default.  
☐ The header is (QOH Other Locations).  
 The QOH is the total of all locations EXCEPT the one you are logged into.  
 This is the same as WHSE QOH with a different label.  
☐ The header is (QOH All Locations).  
 The QOH is the total of all locations INCLUDING the one you are logged into.  
☐ Do not display this Column.  
 Use this selection for Single Store systems.  
☐ The header is (WHSE QTY).  
 The QOH is the total of all locations INCLUDING the one you are logged into.

**AConneX Purchase Order Release Code**

Default Release Code

☒ Regular (Prints on Stocking Order Printer)  
☐ Expedite (Prints on Special Order Printer)  
☐ Will Call (Prints on Special Order Printer)

Ship Code for Stock Orders

Ship Code for Non Stock Orders

**AConneX Multi-Location Lookup Code**

☒ Always lookup alternate locations  
☐ Never lookup alternate locations  
☐ Only lookup alternate locations if item not available

**Defines The Default Release Code & Allows For The Entry Of Specific Shipping Codes For Stock/Non-Stocking Orders.**

| <b>Feature:</b>     | <b>Ability To Select Multiple Parts Groups When Looking Up Parts For A Category</b>  |
| <b>Explanation:</b> | Users now have the ability to select multiple part groups within a specific parts category when looking up parts for vehicle. After left clicking on the specific parts category, the part groups listed now have blank check boxes besides each displayed on the screen. Simply left click on any of the blank check boxes besides the specific part groups you want to lookup information for and then left click on the <i>Show All Selected Part Groups</i> button. The screen will now display parts information for the selected groups. Previously users could only display information for one specific parts group at a time. |

**Left click on the blank check boxes to select multiple part groups.**

**Then left click on the Show All Selected Part Groups button.**

|---------------------|---|
| <b>Feature:</b>     | <b>A New View All Details For Period Button Has Been Added To The Sales Reports</b>   |
| <b>Explanation:</b> | A new <i>View All Details For Period</i> button has been added to the <i>Display Multi-Store Summary Report</i> . This allows you to view all detailed sales for all your stores. Previously, the detailed sales information was only available for each of the individual stores. To view all sales details for all stores by date range, log into the <i>ePartConnection</i> setup web page and left click on the <i>Sales Reports</i> link. Enter the beginning and ending dates and then left click on the <i>Display Multi-Store Summary Report</i> button. The screen will display a summary of the sales for each store. Left click on the <i>View All Details For Period</i> button. The screen will then display a detailed listing of all sales for all stores. |

|---------------------|---|
| <b>Feature:</b>     | <b>Our New Training Videos And Recent Changes Are Now Available Within The ePartConnection Setup Web Page</b>   |
| <b>Explanation:</b> | You are now able to view our new training videos and recent changes through the <i>Help and Suggestions</i> screen tab within the <i>ePartConnection Setup</i> web page. All current additions to ePartConnection will be available here in a PDF format. These changes will include all recent additions to both the <i>ePartConnection</i> main page and changes to the <i>ePartConnection Setup</i> web page. Within the <i>ePartConnection</i> website, your installers will be able to view recent changes just for the <i>ePartConnection</i> web page by left clicking on the <i>Send Email &amp; Help</i> tab screen. Then left clicking on the <i>View Recent Changes to ePart</i> link. |

The screenshot shows the ePartConnection Setup web page. On the left is a vertical navigation menu with links such as [Lecoff](#), [Store Name and Address](#), [Delivery Options](#), [Manage MCL](#), [Catalog Manufacturer Names](#), [Catalog Part Number Prefix/Suffix](#), [Manage Logo](#), [Customer Options](#), [Retail Mode](#), [Independent Warehouse Stock Check](#), [Part Categories](#), [Manage Your Hot Links](#), [Long Location Names](#), [Multi-Location Ordering](#), [Sales Reports](#), [Open Order Reports](#), [Customer Remote IP](#), [Connection Analysis](#), [ePart Messages](#), and [Help and Suggestions](#). The main content area includes a section for "Fast service" with instructions to report errors or share ideas, a link to "Click Here to send an email", and two links: "Click here to view recent changes to epart" and "Click here to view training videos". Three callout boxes provide instructions: one points to the "Help and Suggestions" link in the menu, another points to the "Click here to view recent changes to epart" link, and a third points to the "Click here to view training videos" link.

**Left click here to access the Help and Suggestions screen.**

**Left click here to view the recent changes to ePartConnection.**

**Left click here to view the online training videos.**

|---------------------|--|
| <b>Feature:</b>     | <b>Now Have The Ability To Perform Returns Through ePartConnection</b>   |
| <b>Explanation:</b> | <p>If you are currently using ePartConnection with an Autologue, AIS or Datatron management system, you now have the ability to enable an option that allows your installers to create returns. To enable this option, log into <i>setup.ePartconnection.com</i> web page and left click on the new <i>Allow Returns on Epart</i> check box field. Now when your installers login, a new <i>Returns</i> tab will be displayed on the screen within ePartConnection. The installer now has the ability to create a return parts order for items he would like to return. Within the <i>Returns</i> tab screen, they would simply enter in the product line code, part number, quantity returned and select the type of return for each item being returned. Optionally, a note entry can also be entered. Once they left click on the <i>Submit Your Return Notice</i> button, the entered return items will be printed as comment lines on a pick ticket that will be generated on your management system. <u>Note:</u> This functionality only works on later versions of the software. Contact your customer service representative to ensure your system has the correct version loaded to enable this functionality.</p> |

Submitting a return will send us a notice that you want to return the following items.

| Product Line | Part Number | Qty | Return Type | Reason Code | Delete Item |
|--------------|-------------|-----|-------------|-------------|-------------|
| BCA          | A1          | 2   | New Return  |             | Delete Item |

Add New Row

Notes:

Submit Your Return Notice

The new Returns tab allows installer accounts to enter returns that will generate/print pick tickets on your management system.

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Show A Parts Category When Logging Into ePartConnection</b>   |
| <b>Explanation:</b> | <p>You now have the ability to show a specific <i>Parts Category</i> on the first screen once your installer logs into the <i>ePartConnection</i> website. Enabling this option is a good way to display your monthly specials to your installers. To activate this option, log into <i>setup.ePartconnection.com</i> web page and select the <i>Parts Categories</i> tab on the left side of the page. At the top on the <i>Parts Categories</i> tab screen, a new option <i>Show Non Catalog Parts &amp; Accessories on Login:</i> is now displayed. To activate this option, simply left click on the check box to put a check mark in the box. Left click on the down arrow button displayed to the right of the field and select a Parts Category from the drop down box to show.</p> <div data-bbox="357 648 1482 730"> <p>Show Non Catalog Parts &amp; Accessories on Login: <input checked="" type="checkbox"/> <input type="text" value="Castrol"/> <input type="button" value="v"/> If selected, a non catalog parts &amp; accessories category will be shown below the catalog years when a customer logs in.</p> </div> <p>Once this option is setup, upon logging in, the installer will see the selected Parts Category on the lower portion of the first screen.</p> |

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Search The MCL Table</b>  |
| <b>Explanation:</b> | <p>A new <i>Search Manufacturer By Line Description</i> tab has been added to <i>ePartConnection</i> page. Within this tab, the user can enter a description to search. Simply left click within the blank entry field to the right of <i>Search for Manufacture by Line Description:</i> field description and enter in a description. Left click on the <i>Search</i> button to the right of the entry field and all matching manufacturers from the MCL table will be displayed. <i>Note:</i> This matches only the manufacturer lines you have selected when originally setting up the MCL table.</p> |

| WIX               | Filters - Engine & Transmission               |

**Enter what to search for within the new Search for Manufacturer by Line Description field.**

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>Ability To Have Retail Accounts</b>  |
| <b>Explanation:</b> | This new feature will allow any person regardless of whether or not they are a current customer of yours, to place an order through ePartConnection by typing in their name and address. Then to finalize the transaction, the retail customer will be directed to a google checkout screen to enter in their credit card information and shipping instructions. To activate this option, log into <i>setup.ePartconnection.com</i> web page and select the <i>Retail ePart Options</i> tab on the left side of the page. Left click on the new <i>Enable Retail Mode</i> check box field and then left click within the <i>Retail Customer Number:</i> entry field and enter a retail customer number. |

|                     |   |
|---------------------|---|
| <b>Feature:</b>     | <b>New eTraining Videos Are Now Accessible Through The Help Menu</b>  |
| <b>Explanation:</b> | Our new web eTraining videos are now available through the <i>Send Email &amp; Help</i> tab screen. To access these videos simply left click on the <i>View Tutorials and Training Videos</i> link at the bottom of the page. You will then be taken to our eProducts training page. Select the link for the product you wish to learn more about, by left clicking on the link and a training video for that product start up. |

The screenshot displays the website for AUTOLOGUE™ COMPUTER SYSTEMS INC. The header includes the company name and a navigation menu with links: HOME, PRODUCTS, CORPORATE PROFILE, DEMONSTRATIONS, SHOP AUTOLOGUE, ABOUT US, and CONTACT US. A large banner for "ePaperless Office" features the text "View Invoices - Statements - Parts Purchased - Online" and "eOffice - will integrate with ANY management system." Below the banner, the page is organized into sections for different services, each with a "DEMO" button and a list of "eLearning Tutorial Links".
